

WARNING!

Do not fly near overhead power lines.

Assembly Instructions

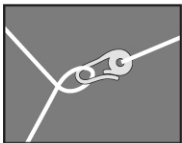

1. Insert left/right spreaders into connector as shown.

2. Insert opposite end of spreaders into wing pockets.

3. Attach QuikClip® to loop on bridle.

Flying Instructions

1. Always find a location that is open and free of buildings or trees.
2. With your back to the wind, release your kite into the air.
3. Let line out slowly while occasionally tugging to gain altitude.
4. For an assisted launch, have a friend hold your kite 50 feet downwind and release kite. Pull in line to gain altitude and release slowly for more distance.

Safety

Don't fly near overhead power lines.
Don't fly in rain or thunderstorms.
Don't fly over people, near traffic or airports.
Don't fly using metallic or wet string.
Don't retrieve a kite from power lines.
Always fly safely.
