5 Unwind all SkyTails® Left, Right, and Center.

Front of Kite

6 Attach the QuikClip® to the Bridle Loop (Front of Kite).

Top Loop: Light to Medium Wind

Bottom Loop: Strong Wind

7 In stronger winds, tie SkyTails® together for more stability.

5 Unwind all SkyTails® Left, Right, and Center.

LAUNCHING - ASSISTED LAUNCH

- The kite requires a minimum wind of 7 mph / 11.3 kph. Let out approximately 75 feet / 22.9 m of line and have an assistant hold the kite.
- With your back to the wind, release the kite and take a few steps backwards, the kite will rise into the air. Tug line to gain altitude, let out line to gain distance.
- For storage, reverse assembly steps and place into package. Store your kite in a cool dry place. Excessive heat and/or sunlight can damage the package and kite.
